

C. S. CAMPBELL ADMITTED TO ALBERTA BAR

Popular Edmonton Athlete Joins Ranks of Province's Barristers

Ranks of Alberta's barristers were increased on Tuesday when Mr. Justice A. F. Ewing, sitting in supreme court chamber, called Clarence S. Campbell to practice at the bar.

As His Lordship ascended the bench, H. H. Parlee, K.C., a Bencher of the Law Society of Alberta, stood by his side and addressed Mr. Campbell. In so doing Mr. Parlee stressed the splendid scholarship of Mr. Campbell and of his constant hard work in law in the last three and one-half years.

His Lordship extended the new barrister a hearty welcome. He felt that the best traditions of the law would be ably upheld and that Mr. Campbell had risen to the high standard expected of those who practice at the Alberta bar.

Clarence S. Campbell was born at Fleming, Sask., and at an early age was moved with his family to Alberta where he received his preliminary schooling.

CAME HERE IN 1926

Mr. Campbell, now a high school teacher, came to Edmonton in 1926 and for a year was enrolled at Strathcona high school.

In the fall of 1928 he registered at the University of Alberta and commenced taking lectures. He was granted a degree in Arts in 1932 and in 1933 was awarded his LL.B. degree with distinction.

For the next year he remained at the Alberta and over October University as a Rhodes Scholar. He returned to England, continuing his studies there with a view to a career of jurisprudence in his main activity.

Returning to this city in 1932, he entered the office of Wm. Buchan and Macdonald, Tegler building, with whom he has been associated ever since. Mr. Campbell has become widely known in legal circles through specializing in insurance.

Following his formal introduction Mr. Campbell was the recipient of many congratulations.

MORE ABOUT NATIONAL BANK

CONTINUED FROM PAGE ONE

has for its fundamental principle not the greatest good to one person or one class, nor even the greatest good to all persons, but the greatest good to all. A socialism that claims equal opportunities to everyone, and which gives equal chances with all others to strive for the best that there is in life, is the only socialism that will be the result of the human element.

The principle of equal opportunity is the first and will always be the first foundation principle. That is, it has always been my contention, and it is mine, that it is on the principle of endeavouring to obtain the greatest good for private gain this resolution merely amounts to an expression of the opinion of the assembly that the best fits of this game should be given to the public.

I say this because I believe that certain rights that belong to the public while public funds are used should be taken back and operated for the benefit of the public.

I am at the point that this resolution is merely an opinion because the matters of banking and finance are not within our power over which that Legislature has no control. It is the right of every man to express an opinion and is fact it is our duty to do so where the public interest is involved.

The resolution says also that if a Federal bank should be particularly for the financing of the provinces and municipalities on the basis:

"That such bank accept the bonds of the provinces and municipalities at par."

"That such bank charge the provinces and municipalities a rate of interest not less than one per cent to cover the base costs of operation plus a reasonable per cent."

"In order to understand the value of these two sections of the resolution we should like to point out that last year:

"Our bare interest charges alone were \$1,000,000.00 and this in addition for advertising the sale of our bonds, for brokers' fees and commissions, postage, telephone and telegrams, office salaries and other expenses in summing up in financing the sum of \$100,000."

"Over and above hundreds of thousands of dollars in exchange."

"The cost of selling below par would be hundreds of thousands of dollars on the basis of thumb-nail advantages."

"Now let us examine the resolution. We find that I need argue only time in arguing the necessity for the creation of currency and the extension of credit."

"So much for the first section of this subject that I am sure that we all agree on the necessity for that."

"The direction and control of the issue of currency and the extension of credit have been in the hands of banks."

"In the case of the Federal Government issue currency and the answer is yes to a degree but not to the extent that it is very largely controlled and directed by brokers, advertising, sale of bonds, etc. I do not think that an answer to the question that has resulted in the banks not only controlling and directing the currency but creating their own system of banking if in other words, the people, and the business both public and private."

ROYAL BANK LETTER

"I am deeply sorry in mutually explaining the terms of extravagance, overproduction, excessive tariff barriers, etc. In varying degrees, these, as well

Admitted To Practice At Bar Monday

CLARENCE S. CAMPBELL, who is admitted to the Alberta bar, was admitted to practice at the bar by Mr. Justice A. F. Ewing in the Supreme Court.

as other contributing factors, essentially unsound, but speaking generally, the most important influence has been the mismanagement of money and credit, determined by the relation of goods and services rendered to the market price level. Supply, and the disastrous fall in the general price level has caused the supply of money to be properly regulated."

"We must repeat the last sentence of this bank's statement to say that when the Royal Bank was created it was the largest and most powerful of the small group that has been directing the currency and credit policy and the extension of credit, making that administration we are all familiar with a step in."

"Now the bank's statement uses the word 'policy' in referring to the supply of money. This means the same as the regulation of the issue of currency and credit. The extension of credit, because the extension of credit is merely a book entry of the bank's assets, is not the same as the passing over of actual currency. What is the security for both the currency and credit?"

"The answer surely is all of the assets of the bank. This is the security held by the country and this resolution says that in our opinion the same assets should be used for the currency and credit should direct and control the issue of currency and credit."

"Because if the country furnishes the security it should respect the securities."

MAKES NO DIFFERENCE

"One can then repeat that this is done through a Federal bank, some a Bank of Canada, some a Provincial bank. All of these mean the same thing. I am sure that everyone who has any knowledge of the use of credit should be for the service of the people and the nation. Can this be done through a bank? Can this be done through a private bank? Through a private monopoly for private profit?"

"The resolution suggests that the issue of currency and the extension of credit should be given to the public."

THE RESOLUTION

"The resolution suggests that this be done through a Federal bank, some a Bank of Canada, some a Provincial bank. All of these mean the same thing. I am sure that everyone who has any knowledge of the use of credit should be for the service of the people and the nation. Can this be done through a bank? Can this be done through a private bank? Through a private monopoly for private profit?"

"The resolution suggests that the issue of currency and the extension of credit should be given to the public."

WISHING PRICES UP

Oilmen have been boasting what prices again.
Hon. H. Stevens says prices are bound to go up.
Hon. W. F. Motherwell agrees with him.

Just what is to send them up neither seemed to know. Except that the world surplus next July may not be more than \$300,000,000 bushels, with Canada having a share of that. And that the oil farmers have been so hard hit some of them may not be able to sow as much wheat as they did last year.

The latter point is one parliament should give immediate attention to. No Canadian farmer who has land in good condition and wants to sow wheat should be prevented sowing because he has not seed or cannot hire help for seeding time. As the Dominion is backing the grain trade to hold up the price of wheat, it should be doing its duty to the farmer to see that some wheat does not end up in storage.

Skeptics will recall that a year ago last November Mr. Stevens said wheat prices were going up. They went down. In January he again said they were going up. And they did. And he was right. No doubt if the Minister keeps on prophesying long enough he will be right some time. It is to be hoped this is the time.

PETER WINS OUT

The outcome of the Virgin Islands is that a converted pervert is at large after having served only half his term.

The Halifax court ruled that deportation was part of the sentence, and that when the sentence was "commuted" also. Therefore he could neither be shipped out of the country nor back to jail.

The Minister of Justice is to Peter, and message to the Doukhobors. Certainly not to the Government or the public. The Government is in the position of having illegally kidnapped him with the intent to illegalize him. His return to the Canadian soil has been surveyed and acre lots placed on the market. This property is part of the Rowland estate.

Several Torontonians have organized a strong company to provide recreational resorts to take the pervert to.

The Canadian Northern has acquired the right to build from Winnipeg to Morden, Manitoba.

The Sultan of Turkey has asserted war on the Balkans by acceding to the demands of the Powers for reform in Macedonia.

as governments are doing in countries that have not enough gold to provide a 30 per cent margin for their restricted currency issues.

France in fact appears to be rather closer to a tax than to a loan, and the country, while the civil servants threaten to go out in a body if their wages are cut any farther.

The depression has played no favorites. It has struck gold countries and goldless countries alike. France, Germany, and other would do themselves a favor if they distributed their hoards in interest-free loans among the countries with which they would like to do business, and with which they must do business if they are to see any return. They have "locked" themselves with gold, in the expression we may not very elegantly language of Hon. L. C. S. A. Murray.

Until in that or some other way gold is redistributed, it is useless to talk about the world returning to a standard, about universality and uniformity of prices and rates of exchange. Without such redistribution the non-gold countries may develop trade and a measure of prosperity among themselves, but France and the United States must continue to "choke."

FORTY Years Ago

From the Files of the Edmonton Bulletin

A smoking concert was given by the men of "G" division of the Police at Ft. Saskatchewan on Thursday evening. Captain W. G. Cawley was chairman.

The program was filled by Messrs. H. Anthony, R. Michael, D. Goodwin, A. H. Rumbull, W. P. Sawyer, J. Mansfield, and M. Cullen.

D. Green and E. F. Studebaker of Genesee, 1120 10th Street, Victoria, Wash., arrived on Monday and will reside here.

The mill of the Edmonton Milling Co. South Edmonton, has been completed and grinding is expected to start on Saturday.

Twenty six cars of coal have been shipped from Edmonton to points down the line since the first of November.

THIRTY YEARS AGO

George Gilmore went down the line this morning.

Docklings of Calgary came up on Wednesday's train.

W. B. Barwise of Calgary is in town.

The Strathearn hockey team which went to Medicine Hat on Wednesday consisted of Colleghay, McKernan, Grabowski, R. Blain, Ritchie, Richards, K. Blair, Blain, and T. Richards.

Mr. and Mrs. Gilmore left Calgary last night.

Rev. Father Fitzpatrick returned from the east last night.

George Manuel left yesterday for Olds.

Mr. A. Brewster has arrived from the east.

The new newspaper suboffice of Edmonton has been surveyed and acre lots placed on the market. This property is part of the Rowland estate.

Several Torontonians have organized a strong company to provide recreational resorts to take the pervert to.

The Canadian Northern has acquired the right to build from Winnipeg to Morden, Manitoba.

The Sultan of Turkey has asserted war on the Balkans by acceding to the demands of the Powers for reform in Macedonia.

TWENTY YEARS AGO

Ottawa—Hon. Frank Cochrane in a report states that the railways have 500 miles of grade in the west for which they cannot get rails.

London—A new and notable record for a flight from Fort McMurray was made by the French pilot, Georges de la Roche. He covered the distance in three hours and five minutes, an average speed of 64 miles per hour.

The district to Spirit River claims a present capacity of from 700 to 800.

Ottawa—Announcement is made that Port North will be the terminus of the Hudson Bay railway.

New York—Stefanoff gave out the plans for the four-year exploration trip he will start next May into the arctic under the auspices of the Canadian Government.

OTTAWA—The Ontario legislature turned down a proposal that proportional representation be introduced into provincial political affairs.

The Alberta legislature unanimously passed a resolution that proportional representation turn over to the provinces the control of natural resources.

Destruction of grasshoppers has last night the province a half million dollars.

TEN YEARS AGO

—A proportion of the Ontario legislature turned down a proposal that proportional representation be introduced into provincial political affairs.

The Alberta legislature unanimously passed a resolution that proportional representation turn over to the provinces the control of natural resources.

Destruction of grasshoppers has last night the province a half million dollars.

WHEN THE BANKS CLOSE

Maryland has followed the lead of Michigan, that state, too, having closed its banks. The experiment of closing banks without a loan is being made again, and without bank credits, and also without the money they have saved and deposited in the banks.

Some discontented citizens in one of these states should make a carefully prepared account of how business is carried on when the banks are closed. It is carried on, of course. People do not stop buying and selling and eating just because the bank doors are closed.

We should throw light on the question of how much business can be done with a relatively small amount of money that is kept in rapid circulation.

When the banks close the community has to get along with what it has. The result is that there is less in the pockets at the time of the emergency to which trade falls off when there is only this fraction of the money supply available for use.

Franklin Roosevelt and Sleepy White had this thought, then threw it away from them much more than once:

And soonest our best men with thee do go—
Death and his bones and soul's delivery!

Thou'rt slave to fate, chance, kings, and desperate men,

And dost with poison, war and sickness die;

And poppy or charms can make us sleep as well
And better than thy stroke. Why, thou'lt thou?

One short sleep past, we wake eternally,

And Death shall be no more: Death, thou'lt thou?

—John Donne.

A CANADIAN PORT

The Shipping Register of Montreal recently published an issue devoted to the harbor of St. John, N.B. This in furtherance of a period of one month, the port has been opened by the Canadian ports. The special issue contains a vast amount of information as to the facilities provided at St. John for handling traffic and as to its favorable location for trans-Atlantic trade.

"CHOKED"

France is the world's greatest treasure house. Its vaults are piled with gold. It is credited with having gathered in about one-half of the total world supply.

France surely should be happy and prosperous. Its people all employed at good wages and enjoying all the material goods of life.

Something that is not the case. The Government there is slashing salaries and boosting taxes. Just

from the Monthly Business Summary issued by the Bank of Montreal: The statement of chartered banks at the close of December showed that current loans during that month decreased \$4,191,000, an amount larger than the increase in deposits. There was also a reduction in non-current debts, but compared with a year ago these were up \$17,478,000. Bank debts to individual accounts in January totalled \$1,069,000,000, as compared with \$2,071,600,000 in January, 1932.

Today gold is in demand, in British Columbia there are vast untagged gold reserves.

Production of gold at the present time is

about the same as the output of copper.

Canada is only responsible for a little more than one-third of the decline.

To this extent has expenditure been reduced.

But the prospectus

for the month of January shows

that the value of gold

is still falling.

Bern Death Quiz Looms

MYSTERY OF FILM CHIEF'S END DEEPENS

Woman's Wet Bathing Suit, a Scream and Cake Involved

LOS ANGELES, Cal., Feb. 28.—A woman's wet, yellow bathing suit, a female scream and a single tet-a-tete at the edge of a private swimming pool and the disappearance of a strange chain of circumstances that kept the question of whacked Paul Bern, film executive, a live issue today.

These unexplained events, all occurring within 24 hours, added to the mystery surrounding the death last September 10 of Bern, the bridegroom of Jean Harlow, platinum blonde screen player, were

CORRECT!

Howard Scott Welcomed Again Among Villagers

NEW YORK, Feb. 28.—Howard Scott came back the other night to the New York home of his old college chum, the Greenwich Village club, which has shamed him into giving some Technicolor a second chance.

He looked less well-grounded than he did the night the American Society of Engineers gave him his big, exciting dinner at Pierre's, but the distinguished guests in full dress and top hats dressed than he used to be in those days seven years I knew him before the blinding light of publicity.

"Yes, we still call our organization 'The Society,'" he said. "No, we haven't the rumored 100,000 members, but we have an advertising budget of \$100,000."

Captain Anthony Eden, acting for the League, also both organizations are ready to consult the United Nations on what the League can do in this matter.

The League "whole co-operation is essential" in this matter.

Scott's speech was directed explicitly at the continuing dispute over the Gran Chaco. It was considered that such a plan might help in solving the trouble in that area.

The Gran Chaco, they believe, may be a useful proving ground for the League, and the embargo with a possibility of employment later in the Far East.

Roosevelt Loses His Tax Papers

HYDE PARK, N.Y., Feb. 28.—Franklin D. Roosevelt had lost his income tax papers in the confusion packing for departure for the White House. He had been unable to search here and in New York with the American pressmen who had been following him, though, remarking they weren't allowed to play around with his salary or anything else that contained his name.

Alberta had 3,638 entries for second annual lands drawing, 1932, of which 1,044 were entries by women settlers.

A MUSEMENTS

STRAND

Mrs. Christopher, manager of the County Grand Jury, kept the death story a live mystery while he reviewed the case with the coroner's jury verdict of suicide.

Last week the district attorney announced he would take up the second inquiry he would investigate the death of Mrs. Bern.

Wideman, declining to join in the press announcement, indicated the district attorney's findings that Bern was a suicide.

NOTICE

In the Estate of JOE KUCIN, late of Edmonton, deceased, of Alberta, Letters, Decrees.

NOTICE is hereby given that all persons having claims against the estate of the above named Joe Kucin, who died at Edmonton, Alberta, on January 1, A.D. 1932, are required to file the same with the Administrator, Mr. McLeod, Building and Trust Co., 1018 10th Street, by May 1, A.D. 1932, a full statement, detailing the nature of the claim, and any securities held by him and that he will then have the right to distribute the assets of the deceased among his heirs in accordance with the law, having regard only to the claims of the deceased and the debts of the estate which have been brought to their attention.

DATED this 27th day of February, A.D. 1932.

JOSEPH ROMANIAN,
Executor for the Estate.

Solicitor for the Executor.

START PROBE MILK PRICES AT MONTREAL

Committee to Enquire Into Spread Between Producer and Consumer

OTTAWA, Feb. 26—Milk producers are asked to submit by March 25 per cent of what the consumer pays the retailer, according to evidence presented before a Senate committee on agriculture here today. The committee, vested with the power to inquire into the milk situation in Canada began its task with Mark Sims (Conn.) (Haldimand).

Two witnesses, Dr. J. F. Singley, dairy commissioner, and Dr. M. A. E. MacLennan, agricultural economist, presented statements on consumption figures and price grants to the industry. Dr. MacLennan said in two Canadian cities, Shawinigan and Rivière-Rouge, a quart of milk was less than five cents a quart while in Saint John—the capital of New Brunswick—a quart of milk cost 75 cents.

The committee's probe will first embrace Montreal and then turn to the other cities of the Dominion from East to West.
